RT ticket:			
Affected versions:			

Description

The old koumbit apt-key is still present in /etc/apt/trusted.gpg:

```
root@host236:~# apt-key list
/etc/apt/trusted.gpg
-----
pub 1024D/F42584E6 2008-04-06 [expired: 2012-05-15]
uid                               Lenny Stable Release Key <debian-release@lists.debian.org>

pub 4096R/55BE302B 2009-01-27 [expired: 2012-12-31]
uid                               Debian Archive Automatic Signing Key (5.0/lenny) <ftpmaster@debian.org>

pub 2048R/6D849617 2009-01-24 [expired: 2013-01-23]
uid                               Debian-Volatile Archive Automatic Signing Key (5.0/lenny)

pub 4096R/B98321F9 2010-08-07 [expires: 2017-08-05]
uid                               Squeeze Stable Release Key <debian-release@lists.debian.org>

pub 4096R/473041FA 2010-08-27 [expires: 2018-03-05]
uid                               Debian Archive Automatic Signing Key (6.0/squeeze) <ftpmaster@debian.org>

```

so we have a dupe and changes to our package will not be respected. we should remove the key on postinst. i tried this:

```
apt-key del B7C0A70A
```

and it works fine - and doesn't touch our package in trusted.d.

before we do this, we need to propagate through puppet otherwise puppet will add the key back, see [#14265](#).
