Koumbit scripts - Bug #30748

CI is busted for koumbit-scripts

Description

So I've hacked a bunch around of shit to get the CI to actually compile koumbit-scripts.

I've set the jenkins-debian-glue on hold on jenkins0 ; I've made a backup file of /usr/bin/build-and-provide-package in /usr/bin/build-and-provide-package.bak

It would be nice to check the diff, see if all the parts are necessary to get the thing to build and push upstream some of the bug fixes.

Well, I've tried to put the old code and set architecture to amd64 and now everything works. Closing this.
