I have started working on the training feature and the relevant module, here are my notes on implementing uc_signup style functionality for D7

Using hook_uc_signup_sign_up, or a form_alter on the signup form:

- Add the training to the user's cart if it is not already there
- Add the validated form submission to the data field of the order
- Display a msg thanking people and telling them they must proceed to checkout in order

Using hook_uc_cart_checkout, or whatever passes for it in D7:

- On checkout completion, submit the signup.

Using form alters on the administrative forms in signup:

- Display order payment statuses next to each signup (this will require a column on the
